TECHNICAL SKILLS

Ruby, Ruby on Rails, SQL, CSS, HTML, JavaScript, React, Redux, PostgreSQL, SQLite3, API

TECHNICAL PROJECTS

RecipeApp- [Github](#) | [Demo](#) | [Heroku](#)

This is an app that allows users to post and view their recipes

username: demo, email: demo@demo.com, password: password

- Built this Ruby on Rails application because it's something I find useful myself
- Implemented OAuth for the user signup experience
- Implemented the MVC Pattern
- Executed this application using ActiveRecord and SQLite

Gone Fishin' - [Github](#) | [Demo](#) | [Heroku](#)

Users can add their favorite fishing destinations

- Utilized React Frontend
- Created Ruby on Rails backend using ActiveRecord and RESTful routes
- This app has full CRUD functionality
- Utilized thunk and redux while building this application

Vacation-Wishlist - [Github](#) | [Demo](#) | [Heroku](#) (email: demo@demo.com, password: demo)

A Ruby application that keeps track of your vacation dreams

- Built this Ruby application using Sinatra
- Developed the app so that users have the ability to log in or signup
- Demonstrated the use of Bcrypt to authenticate users and keep passwords safe
- Implemented full CRUD ability

EXPERIENCE

Women For Conservation

WordPress Software Engineer (Volunteer)

12/2020 - Present

- Maintained WordPress pages, posts, plugins, and all other website content.
- Ensured the website and database are backed up routinely.
- Created new pages as requested and applied styles as appropriate.

Engineering Excellence

Self Perform Service Coordinator

Blue Ash, OH

05/2014 - Present

- Responded to incoming calls from technicians that are checking into or out of a job. Obtain all pertinent details and provide them to the customer, typically via a third-party system so that the customers' corporate offices stay aware of the repairs
- Verified invoices so that the vendor gets paid in a timely manner
- Determined the technician has everything they need to complete the job successfully, such as parts, materials, etc.
- Coordinated all service calls so that they are dispatched according to priority
